Hiring Manager

City of Toronto

Transportation Services – Operations Maintenance

Bering Yard, 320 Bering Avenue, Toronto, ON

Dear Hiring Manager,

I currently live in Toronto and am applying to the City of Toronto for the Research Analyst 1 position with Transportation Services, Job ID 64345. I earned my Master of Business Analytics from Edith Cowan University in Australia and my Integrated Master of Business Administration from Atmiya University in India. I am motivated by the opportunity to support infrastructure maintenance through reliable research, operational data, documented findings, and performance reporting.

As a Data Intern at AYLA Solutions in Australia in 2025, I gathered and documented business, data, and reporting requirements and translated stakeholder questions into structured analytical needs and KPI definitions. I supported SQL extraction and validation, prepared advanced Excel reports, and contributed dashboard insights for performance tracking. Through Agile planning and reviews, I communicated progress and findings and maintained clear analytical documentation. This strengthened my ability to organize evidence and provide decision-ready reporting.

My research and analytical projects provide concrete evidence across survey, statistical, trend, and operational analysis. For an online GST-filing study, I designed and conducted a survey of small businesses in Gujarat, analyzed responses in SPSS, interpreted adoption patterns and barriers, documented findings and recommendations, and earned an A grade. A Bank of Baroda project used Excel and SQL to clean, visualize, and analyze customer transaction trends. In healthcare operations analytics, I connected six data entities and evaluated appointment completion, costs, billing status, clinician workload, and claims using CTEs and window functions, supported by repeatable validation and documented reporting plans.

My earlier roles at Trans Globe Education and Arihant Investment in India strengthened my administrative reporting, market research, workflow coordination, client and institutional communication, records management, and careful handling of confidential information. Graduate coursework in Analytics and Business Decision Making, Supply Chain Analytics, Databases and Business Intelligence, Project Management, and Business Systems Analysis strengthened my research and operational-analysis foundation.

I would bring disciplined research, data validation, clear documentation, and a strong learning mindset while developing specialized municipal-infrastructure, GIS, GPS/AVL, TMMS/Maximo, inspection, tendering, and road-maintenance knowledge. I am ready to learn from operations staff and contribute accurate analytical support.

Thank you for considering my application. I welcome the opportunity to discuss this position.

Best regards,

Jainali Mehta
