## Hiring Manager

City of Toronto  
Chief Financial Officer's Office  
Strategic Enterprise Integration & Modernization  
Toronto, ON

Dear Hiring Manager,

I currently live in Toronto and am applying for the Business & Financial Analyst (Data) position in the City of Toronto's Chief Financial Officer's Office, Job ID 65341. I earned my Master of Business Analytics from Edith Cowan University in Australia and my Integrated Master of Business Administration from Atmiya University in India. The opportunity to support enterprise modernization through accurate data, documented requirements, testing discipline, and decision-ready reporting strongly matches the analytical foundation I am building.

As a Data Intern at AYLA Solutions in Australia in 2025, I gathered and documented business, data, and reporting requirements and translated stakeholder questions into structured analytical needs and KPI definitions. I supported SQL extraction and validation, prepared advanced Excel reports, and contributed dashboard insights for performance tracking. Through Agile planning and reviews, I communicated progress and findings and maintained clear analytical documentation. This experience strengthened my ability to support controlled, collaborative delivery.

My portfolio demonstrates data-quality and reporting practices relevant to transformation work. In e-commerce analytics, I connected customers, products, orders, line items, and payments using primary and foreign keys, uniqueness rules, checks, and a documented recognized-revenue definition. I analyzed revenue, customer spend, order frequency, product rankings, and payment methods and added repeatable validation and GitHub Actions. Healthcare and workforce models extended this work to billing, claims, salaries, performance, and operational KPIs. Across the projects, I documented assumptions, converted validated SQL findings into AI-assisted recommendations, and completed Power BI KPI and dashboard planning.

Earlier roles at Trans Globe Education and Arihant Investment in India strengthened my administrative reporting, workflow coordination, confidential-record handling, client and institutional communication, and attention to accuracy. Coursework in Business Systems Analysis, Databases and Business Intelligence, Business Process Management, Project Management, and Enterprise Architecture further developed my understanding of processes, data, systems, and controlled change.

I would bring disciplined analysis, clear documentation, careful handling of sensitive information, and a strong learning mindset to the City's future-state implementation. I am prepared to build deeper enterprise SAP, materials-management, migration, and testing knowledge while supporting experienced project, technology, divisional, and vendor teams with dependable analytical work.

Thank you for considering my application. I welcome an opportunity to discuss my fit for the position.

Best regards,

Jainali Mehta
