

SKILLS

Cloud & Platform: Go, TypeScript, Python, Node.js, AWS, GCP, Kubernetes, Terraform, Docker, CI/CD
Networking & Security: TCP/IP fundamentals, HTTP, TLS, OAuth 2.0, OIDC, IAM, SSO, Zero-Trust
Distributed Systems: service-to-service communication, multi-cloud platforms, reliability, scalability, failover
Observability & Ops: OpenTelemetry, Kafka, ELK, Prometheus, alerting, tracing, operational hygiene
Developer Enablement: sample services, SDKs, reference implementations, documentation, workshops

EXPERIENCE

- Royal Bank of Canada (RBC)** Toronto, Canada
Staff Software Developer & Enterprise Architect Nov 2022 – Present
 - Enterprise Platform Delivery:** Led 0-to-1 production delivery of a Node.js, TypeScript, and React enterprise blueprint platform with real-time data rendering, reusable workflows, and secure service integration patterns adopted across the organization.
 - Reusable Infrastructure Patterns:** Drove Terraform-based infrastructure modules across AWS and GCP to eliminate point-to-point integrations, standardize deployments, and reduce operational complexity for platform consumers.
 - Operational Observability:** Standardised OpenTelemetry log schemas and onboarding guides used by 20+ engineering teams, improving consistency for tracing, alerting, and cross-team troubleshooting.
 - Security & Governance:** Defined and operationalised enterprise AI governance covering Responsible AI, IAM, audit trails, regulatory compliance, and sovereign-cloud constraints across AWS, GCP, and OCP.
 - Team Leadership:** Led 5 engineers with weekly sprint cadence, code reviews, ADRs, mentorship, and cross-functional alignment with product, risk, and architecture stakeholders.
- HealthCard** Remote
Blockchain Architect & First Full Stack Engineer Aug 2021 – Jul 2022
 - Cloud-Native 0-to-1 Build:** Joined as first engineer and built the product from scratch: React/TypeScript frontend, Node.js/Express REST API, Hyperledger Fabric verification layer, and AWS EKS deployment with HIPAA-compliant audit logging.
 - Platform Hardening:** Owned architecture decisions across frontend, API, and deployment layers, balancing reliability, maintainability, and security in a small-team environment.
- Dalhousie University** Halifax, Canada
Teaching Assistant & Research Assistant Jan 2021 – Aug 2022
 - Teaching Support:** Supported Software Development, Algorithms, and Advanced Cloud Computing courses through lab sessions, assignment support, and systems fundamentals coaching.
 - Research Support:** Worked on call-stack decision algorithms for compiler and runtime research, strengthening low-level systems reasoning and execution-path analysis.

PROJECTS

- Agent Authorization Gateway:** Built a prototype OAuth/OIDC policy layer for MCP and A2A agent access, with audit logging, reusable SDK-style integrations, and phishing-resistant authorization flows.
- Enterprise Auth Sample Pack:** Assembled secure identity integration samples showing login, token handling, and service-to-service authorization patterns for internal developers and architecture reviews.
- DCS-BBN: Blockchain-Based Cloud Storage:** Designed a decentralized storage network using Solidity, Hyperledger Fabric, and zk-SNARK proofs for privacy-preserving verification; published in Springer ICMR.

EDUCATION

- University of Toronto** Toronto, Canada
Enterprise Architecture Certification (3-semester program) Completed 2024
- Dalhousie University** Halifax, Canada
Master of Applied Computer Science; GPA: 3.9/4.0 Jan 2021 – Aug 2022
- Gujarat Technological University** India
BE Computer Engineering; GPA: 3.92/4.0 Aug 2016 – Aug 2020
