

SKILLS

Solutions: Discovery, demos, POCs, pilot scoping, deployments, customer escalations
Delivery: Milestones, deliverables, risk tracking, executive updates, technical specs, runbooks
Cloud & Infra: AWS, GCP, Kubernetes, Docker, Terraform, CI/CD, networking, storage
Security Reviews: SOC 2, InfoSec questionnaires, IAM, audit trails, data handling, OSFI/GDPR
AI Platforms: LLMs, RAG, Responsible AI, guardrails, bias controls, evaluation, auditability
Data & APIs: Kafka, Airflow, Snowflake, Elasticsearch, SQL, REST APIs, GraphQL, Node.js
Observability: OpenTelemetry, ELK, CloudWatch, distributed tracing, SLOs, log debugging
Languages: TypeScript, JavaScript, Python, Go, React, Node.js, Express, GraphQL

EXPERIENCE

- Royal Bank of Canada (RBC)** Toronto, Canada
Staff Software Developer & Enterprise Architect Nov 2022 – Present
 - Enterprise AI & Architecture Platform:** Led 0-to-1 delivery of a patent-pending Node.js, TypeScript, and React blueprint platform with rules-based recommendations, auto-certification, real-time rendering, and secure enterprise service matching; adopted across air-gapped, security-constrained environments.
 - Technical Stakeholder Ownership:** Serve as engineering point of contact for architecture, security, infrastructure, risk, and product stakeholders; translate ambiguous requirements into milestones, trade-offs, technical specs, demos, and delivery plans.
 - GenAI Customer-Style Enablement:** Building ASB Assist, an LLM + RAG interface that converts natural-language requirements into compliant architecture diagrams and service recommendations with audit trails, guardrails, and Responsible AI controls.
 - Production Observability Platform:** Architected institution-wide telemetry platform using OpenTelemetry, Vector, Fluent Bit, Kafka, and Logstash ingesting 150 TB/day across 10,000+ systems; enabled log tracing, SLA debugging, and downstream AIOps/ML ops use cases.
 - Security, Compliance & Reviews:** Defined AI governance and architecture standards covering IAM, auditability, data handling, OSFI/GDPR concerns, cloud controls, and vendor/security review patterns for regulated enterprise deployments.
 - Delivery Leadership:** Led 5 engineers with sprint cadence, code reviews, ADRs, onboarding guides, runbooks, and cross-functional alignment to keep platform commitments visible.
- HealthCard (Acquired Startup)** Remote
Blockchain Architect & First Full Stack Engineer Aug 2021 – Jul 2022
 - 0-to-1 SaaS & Cloud Deployment:** Built the product from scratch as first engineer: React/TypeScript frontend, Node.js/Express REST APIs, Hyperledger Fabric verification layer, and AWS EKS deployment with HIPAA-aligned audit logging.
 - Insurance Workflow Automation:** Designed insurance validation and trust-score workflows for real-time premium verification and fraud-resistant claims processing; balanced security, customer usability, and production reliability in a small-team environment.
- Canada Revenue Agency (CRA)** Ottawa, Canada (Remote)
Software Developer Co-op Apr 2022 – Nov 2022
 - Government Platform Modernization:** Migrated federal tax platform UI from Apache Struts to React/TypeScript and contributed to API layers serving millions of Canadians with WCAG accessibility and automated quality gates.

PROJECTS

- Enterprise Document Q&A and Evaluation Harness:** Built a LangChain + pgvector RAG prototype over messy document corpora with offline evaluation sets, prompt/version comparison, citation checks, and regression metrics for auditable answer quality.
- DCS-BBN: Blockchain-Based Cloud Storage:** Designed decentralized storage using Solidity, Hyperledger Fabric, and zk-SNARK proofs for privacy-preserving verification; published in Springer ICMR.

EDUCATION

- Dalhousie University** Halifax, Canada
Master of Applied Computer Science; GPA: 3.9/4.0 Jan 2021 – Aug 2022
- University of Toronto** Toronto, Canada
Enterprise Architecture Certification (3-semester program) Completed 2024
- Gujarat Technological University** Ahmedabad, India
BE Computer Engineering; GPA: 3.92/4.0 Aug 2016 – Aug 2020
