Hiring Manager

RBC

Toronto, ON

Dear Hiring Manager,

I am applying for the Strategy Business Analyst position with RBC Investor Services. The opportunity to connect Data & Digital priorities with coordinated execution is especially compelling to me because it combines the business-analysis, reporting, and communication capabilities I have deliberately developed through graduate study, an Australian data internship, and independent analytics work. I bring an early-career perspective, strong learning discipline, and a willingness to earn trust through accurate work and dependable follow-through.

As a Data Intern at AYLA Solutions in Australia, I gathered and documented business and reporting requirements, supported SQL-based extraction and validation, prepared advanced Excel reports, and contributed dashboard insights for performance tracking. Participating in Agile sprint planning and reviews taught me to connect stakeholder questions with structured analytical tasks, communicate progress, and preserve the documentation needed for aligned delivery. Earlier, as a Support Executive, I coordinated updates between students and institutions while maintaining accurate records and supporting reporting and market research. That experience strengthened the clear communication and process discipline needed when several parties depend on the same information.

My portfolio shows how I learn unfamiliar domains and convert complex data into decision-ready material. In E-Commerce Sales Analytics, I modelled customers, products, orders, line items, and payments; defined recognized revenue; analyzed performance; and converted validated SQL findings into recommendations and a structured Power BI reporting plan. In a Bank of Baroda academic project, I used Excel and SQL to analyze transaction patterns and presented recommendations for customer engagement and service delivery. My earlier administrative role at Arihant Investment also provided exposure to investment-services operations, confidential client records, and the importance of reliable information.

I recognize that this opportunity asks for broader enterprise and executive-facing experience than I have yet held. I would not overstate that gap. What I offer is a verified foundation in requirements, KPI reporting, strategic research, process coordination, Agile ways of working, and financial-services context. Graduate coursework covered business systems, enterprise architecture, process and project management, and decision analytics.

RBC's emphasis on integrity, collaboration, and progressive growth closely matches how I approach new responsibility. I would welcome the opportunity to support the Strategic Solutions team with careful analysis, concise communication, reliable reporting, and the curiosity to learn RBCIS's technology ecosystem quickly.

Thank you for your time and consideration. I look forward to discussing how I could contribute to your team.

Best regards,

Jainali Mehta
