Hiring Manager

Prospective Employer

Toronto, ON

Dear Hiring Manager,

I am seeking an entry-level Business Analyst or Data Analyst opportunity with your organization. I completed a Master of Business Analytics at Edith Cowan University in Australia and an Integrated Master of Business Administration at Atmiya University in India. I am building my analytics career in Toronto through requirements gathering, PostgreSQL, SQL, advanced Excel, KPI reporting, Power BI planning, and stakeholder collaboration.

As a Data Intern at AYLA Solutions in Australia, I gathered and documented business, data, and reporting requirements, supported SQL-based extraction and validation, prepared advanced Excel reports, and contributed dashboard insights for performance tracking. Through Agile planning and review sessions, I coordinated analytical tasks, communicated progress, and maintained accurate documentation.

My portfolio demonstrates an end-to-end analytical workflow across e-commerce, healthcare, and workforce projects. I designed normalized PostgreSQL models, defined decision-relevant KPIs, and used joins, CTEs, segmentation, rankings, running totals, and window functions to answer operational and financial questions. Each repository includes repeatable validation, AI-assisted business insights and recommendations, and structured Power BI dashboard planning. Interactive dashboard implementation remains the next stage.

Earlier roles at Trans Globe Education and Arihant Investment strengthened my process coordination, reporting support, confidential record handling, client communication, and attention to data accuracy. My graduate study in Business Systems Analysis, Databases and Business Intelligence, and Business Process Management further developed my ability to connect business needs with structured analytical solutions.

I am drawn to opportunities that connect structured business analysis with reliable data and decision-focused reporting. I would welcome the chance to contribute careful analysis, clear requirements, reliable reporting, and dependable stakeholder support while continuing to grow as an analyst.

Thank you for your time and consideration. I look forward to discussing how I could contribute to your team.

Best regards,

Jainali Mehta
