RE: Business Intelligence Analyst, Hard Rock Digital

Dear Hiring Manager,

I am applying for the Business Intelligence Analyst position with Hard Rock Digital. I completed a Master of Business Analytics at Edith Cowan University in Australia and now live in Toronto. My foundation combines Australian Data Intern experience with PostgreSQL, SQL, advanced Excel, relational modelling, revenue and customer analysis, data validation, KPI reporting, and decision-focused communication.

At AYLA Solutions in Australia, I gathered and documented reporting requirements, supported SQL-based extraction and validation, prepared advanced Excel reports, and contributed business-performance insights. Agile planning and review sessions strengthened my ability to clarify analytical needs, manage individual work within a team, communicate progress, and maintain dependable documentation.

My E-Commerce Sales Analytics project provides my strongest revenue evidence. I modelled customers, products, orders, line items, and payments; defined recognized revenue to exclude pending, refunded, and cancelled activity; and analyzed customer spend, order frequency, product rankings, monthly revenue, and payment methods. I used keys, checks, repeatable validation, trend analysis, and SQL-grounded recommendations to make the results defensible. A separate Bank of Baroda project used Excel and SQL to examine transaction patterns and recommend customer-engagement improvements.

My BI platform evidence is dashboard and KPI planning rather than completed production implementation. I would bring directly supported strengths in SQL, advanced Excel, revenue logic, lag and trend analysis, customer segmentation, quality controls, and AI-assisted interpretation grounded in validated outputs. These foundations give me a disciplined starting point for learning gaming economics, finance-owned reporting, and the team's dashboard environment while contributing careful analysis from the outset.

Hard Rock Digital's combination of a globally recognized entertainment brand with a fast-moving digital product environment is compelling. I would welcome the opportunity to contribute rigorous analysis, transparent assumptions, clear recommendations, and an active-learning mindset to the FP&A team while helping understand customer behaviour and revenue performance.

Thank you for your time and consideration. I look forward to discussing how I could contribute to your team.

Best regards,
Jainali Mehta
