RE: Data Analyst, Reference #13997

Dear Ms. Manoharan,

I am applying through Options Consulting Solutions for the 12-month Data Analyst contract, reference #13997. I completed a Master of Business Analytics at Edith Cowan University in Australia and now live in Toronto. My foundation combines Australian Data Intern experience with advanced Excel, SQL, KPI reporting, data validation, records coordination, documentation, and stakeholder communication.

At AYLA Solutions in Australia, I gathered and documented reporting requirements, supported SQL-based extraction and validation, prepared advanced Excel reports, and contributed dashboard insights for performance tracking. Agile planning and review sessions strengthened my ability to clarify analytical needs, organize work, communicate progress, and maintain accurate documentation with colleagues.

My project work demonstrates both reporting discipline and attention to detail. In E-Commerce Sales Analytics and HR Analytics, I defined operational and financial KPIs, added integrity rules and repeatable validation, investigated trends, documented recommendations, and completed Power BI KPI and dashboard planning. In my Online GST Filing Adoption Research, I cleaned and analyzed survey responses using Excel formulas, sorting, filtering, pivot tables, percentages, and charts before documenting adoption patterns and barriers.

Earlier roles at Trans Globe Education and Arihant Investment developed my administrative reporting, record maintenance, follow-up coordination, client communication, and discretion with confidential information. I understand that this assignment also requires hands-on Power BI dashboard development, SharePoint administration, and Power Automate workflows. My verified Power BI evidence is currently KPI and dashboard planning rather than a completed interactive build, and I would approach those implementation requirements with transparency and focused learning.

The confidential client's focus on professional development and the role's combination of Excel reporting, KPI coordination, records accuracy, stakeholder follow-up, and process improvement are especially appealing. I would welcome the opportunity to contribute reliable analysis, organized reporting, careful documentation, and a proactive learning mindset within the client's collaborative environment.

Thank you for your time and consideration. I look forward to discussing how I could contribute to your team.

Best regards,
Jainali Mehta
