RE: Data Analyst, KPMG in Canada

Dear Hiring Manager,

I am applying for the Data Analyst position with KPMG in Canada. I completed a Master of Business Analytics at Edith Cowan University in Australia and now live in Toronto. My foundation combines Australian Data Intern experience with advanced Excel, SQL, data validation, KPI reporting, requirements gathering, and careful stakeholder communication—skills that align well with accurate monthly reporting and decision-focused analysis for internal teams.

At AYLA Solutions in Australia, I gathered and documented business and reporting requirements, supported SQL-based extraction and validation, prepared advanced Excel reports, and contributed dashboard insights for business performance tracking. Through Agile planning and review sessions, I learned to clarify analytical requests, prioritize work, communicate progress, and maintain reliable documentation in a collaborative environment with shared deadlines.

My portfolio demonstrates relevant financial and operational analysis. In my E-Commerce Sales Analytics project, I defined recognized-revenue rules, analyzed monthly revenue and payment patterns, and created repeatable checks to protect reporting accuracy. My HR Analytics project examined compensation and workforce KPIs, while my Bank of Baroda project used Excel and SQL to analyze customer transactions and present practical recommendations. Across this work, I have translated detailed data into clear findings, maintained validation controls, and planned Power BI KPIs and dashboard views.

Earlier roles at Trans Globe Education and Arihant Investment strengthened my reporting support, workflow coordination, confidential record handling, and attention to accuracy under competing deadlines. Graduate coursework in databases, business intelligence, analytics, and project management further developed my ability to connect business questions with structured analysis. I am ready to build on these foundations by learning KPMG's SmartView and enterprise financial-planning environment.

I am drawn to KPMG because its tax practice emphasizes data-driven solutions and the accuracy, efficiency, and transparency of reporting, while its values place integrity, excellence, courage, collaboration, and meaningful impact at the centre of the work. I would welcome the opportunity to support the Regional Financial Analyst with dependable monthly reporting, ad hoc analysis, budget preparation, and evidence-based recommendations while continuing to grow as an early-career analyst.

Thank you for your time and consideration. I look forward to discussing how I could contribute to your team.

Best regards,
Jainali Mehta
