RE: GBM - Investment Banking Analyst (Financial Institutions Group) - New Grad, Scotiabank

Dear Hiring Manager,

I am applying for the GBM - Investment Banking Analyst (Financial Institutions Group) - New Grad position with Scotiabank. I now live in Toronto and hold a Master of Business Analytics from Edith Cowan University in Australia and an Integrated Master of Business Administration from Atmiya University in India. My foundation combines advanced Excel, SQL, quantitative analysis, financial-services administration, market research, client support, and careful documentation.

At AYLA Solutions in Australia, I gathered and documented business and reporting requirements, prepared advanced Excel reports, supported SQL extraction and validation, and contributed business-performance insights. Participating in planning and review sessions strengthened my ability to organize analytical work, communicate progress, respond to feedback, and maintain accurate documentation within a team.

My finance-related evidence includes administrative experience at Arihant Investment, where I maintained accurate, confidential client records and supported daily operations, and the NISM Series XII Securities Markets Foundation credential. In a Bank of Baroda academic project, I used Excel and SQL to analyze customer transaction patterns, visualize trends, and recommend customer-engagement improvements.

My E-Commerce Sales Analytics project further developed my ability to organize financial and operating data, define recognized-revenue logic, and analyze customer spend, order frequency, product rankings, monthly revenue, and payment methods. Separate survey research required structured data collection, Excel analysis, written findings, and recommendations. Together, these experiences demonstrate quantitative discipline, research ability, attention to detail, and clear communication.

My experience is adjacent to investment banking rather than direct transaction execution, and I would not overstate it as valuation or M&A experience. My interest is grounded in how financial institutions allocate capital, finance growth, evaluate strategic combinations, and respond to changing market and regulatory conditions. Scotiabank's Financial Institutions Group offers the rigorous analysis, client exposure, teamwork, and structured development I am seeking. I would bring energy, integrity, intellectual curiosity, and a willingness to build the technical standards expected of an Analyst.

Thank you for your time and consideration. I look forward to discussing how I could contribute to your team.

Best regards,
Jainali Mehta
