RE: Branch Network Planning and Business Analysis, Scotiabank

Dear Hiring Manager,

I am applying for the Branch Network Planning and Business Analysis opportunity, Requisition 269040, with Scotiabank in Toronto. I completed a Master of Business Analytics at Edith Cowan University in Australia after earning an Integrated Master of Business Administration in India, and I now live in Toronto. I offer an early-career foundation in advanced Excel reporting, requirements documentation, workflow coordination, progress communication, and careful stakeholder support.

At AYLA Solutions in Australia, I gathered and documented business and reporting requirements, supported SQL-based extraction and validation, prepared advanced Excel reports, and contributed insights for business performance tracking. Through Agile planning and review sessions, I learned to clarify needs, organize analytical work, communicate progress, and maintain accurate documentation. These habits align closely with keeping project inputs, status information, and follow-ups clear for a multi-stakeholder team.

My Bank of Baroda Customer Behaviour Analysis provides relevant banking-oriented evidence. I used Excel and SQL to clean and examine transaction patterns, visualize trends, and present recommendations for customer engagement and service delivery. In my Online GST Filing Adoption Research, I designed a survey and used Excel formulas, sorting, filtering, pivot tables, percentages, and charts to identify adoption barriers. Together, these projects show how I organize information and develop clear recommendations.

Earlier roles at Trans Globe Education and Arihant Investment strengthened my ability to coordinate process updates, maintain accurate and confidential records, support reporting, and communicate with clients and institutions. This experience required consistent follow-through while balancing administrative priorities. My Microsoft Office foundation and experience presenting project findings would also support the preparation of clear summaries and materials while I learn Scotiabank's preferred PowerPoint standards.

I am drawn to this opportunity because it connects analysis, coordination, and communication to decisions that shape how customers access Scotiabank's branch network. Although my experience is adjacent rather than direct Canadian branch-network or real-estate planning, I would bring disciplined documentation, advanced Excel skills, sound judgment about verified information, and genuine curiosity about market reviews, network initiatives, and business-case development.

Thank you for your consideration. I would welcome the opportunity to discuss how my analytical foundation and dependable coordination style could support the Branch Network Planning and Business Analysis team.

Best regards,
Jainali Mehta
