RE: Data Analyst - Global Compliance Data Analytics (Contract), Scotiabank

Dear Hiring Manager,

I am applying for the Data Analyst - Global Compliance Data Analytics (Contract) position with Scotiabank. I completed a Master of Business Analytics at Edith Cowan University in Australia and now live in Toronto. My early-career foundation combines Australian Data Intern experience with PostgreSQL, SQL, relational modelling, data-quality controls, requirements gathering, advanced Excel, and documentation.

At AYLA Solutions in Australia, I gathered and documented business and reporting requirements, supported SQL-based extraction and validation, prepared advanced Excel reports, and contributed business-performance insights. Participating in Agile planning and review sessions strengthened my ability to clarify analytical needs, communicate progress, and maintain dependable documentation within a team environment.

My E-Commerce Sales Analytics project provides direct evidence of governance-oriented foundations. I connected customer, product, order, line-item, and payment data through a relational model and applied primary and foreign keys, uniqueness rules, checks, documented business rules, repeatable validation, and GitHub Actions. My healthcare and workforce projects extend this evidence through normalized models, CTEs, window functions, rankings, segmentation, running totals, lag comparisons, validation, and decision-focused recommendations.

My current evidence represents a strong foundation rather than ownership of production compliance-governance tooling or data pipelines. I would bring transparent learning, disciplined validation, clear documentation, and the ability to translate requirements into structured analytical work. My completed Power BI evidence is limited to KPI and dashboard planning, which I present accurately rather than as implemented production reporting.

Earlier experience at Arihant Investment developed my respect for accurate, confidential financial-services records, while a Bank of Baroda academic project strengthened my Excel- and SQL-based customer transaction analysis. Scotiabank's commitment to responsible data use, governance, customer focus, and inclusive performance is compelling. I would welcome the opportunity to contribute reliable analysis, documented controls, thoughtful questions, and an active-learning mindset to Global Compliance Data Analytics.

Thank you for your time and consideration. I look forward to discussing how I could contribute to your team.

Best regards,
Jainali Mehta
