Recruitment Consultant, Altis Recruitment

Re: Business Analyst, Parking Development

Toronto, ON

Dear Hiring Manager,

I am applying through Altis Recruitment for the Business Analyst, Parking Development opportunity in Toronto. I completed a Master of Business Analytics at Edith Cowan University in Australia after earning an Integrated Master of Business Administration at Atmiya University in India, and I now reside in Toronto. I offer an early-career foundation in data analysis, operational reporting, advanced Excel, SQL, KPI and dashboard planning, requirements documentation, project support, and stakeholder communication.

As a Data Intern at AYLA Solutions in Australia, I gathered and documented business and reporting requirements, translated stakeholder questions into structured analytical tasks, supported SQL extraction and validation, and prepared advanced Excel reports and dashboard insights for performance tracking. Through Agile sprint planning and reviews, I communicated progress and maintained accurate analytical documentation. This experience developed my ability to connect business questions, reliable data, clear reporting, and coordinated delivery.

My published E-Commerce Sales Analytics project demonstrates customer, operational, and financial analysis across spend, order frequency, product performance, monthly revenue, and payment methods. Healthcare Patient & Hospital Analytics measures appointment completion, treatment costs, billing status, clinician workload, and insurance claims. Both projects use relational models, SQL, documented definitions, validation controls, AI-assisted recommendations grounded in SQL findings, and completed Power BI dashboard planning. My Bank of Baroda Customer Behaviour Analysis adds Excel- and SQL-based transaction analysis, visualized trends, and recommendations for customer engagement and service delivery.

Earlier roles at Trans Globe Education and Arihant Investment strengthened my workflow coordination, reporting support, client communication, record accuracy, and confidential information handling. Coursework in Business Systems Analysis, Databases and Business Intelligence, Analytics and Business Decision Making, Business Process Management, and Project Management further developed my understanding of requirements, processes, performance measurement, and implementation support.

I am drawn to this opportunity because it connects meaningful operational analysis with customer experience, continuous improvement, and public-facing services used across Toronto. I would bring analytical curiosity, careful validation, clear reporting, dependable coordination, and a learning mindset while developing deeper knowledge of municipal parking operations, system testing, and the client's implementation practices.

Thank you for your time and consideration. I look forward to discussing how I could contribute to your team.

Best regards,

Jainali Mehta
