Hiring Manager

City of Toronto

Toronto Paramedic Services – Operational Support

4330 Dufferin Street, Toronto, ON

Dear Hiring Manager,

I currently live in Toronto and am applying to the City of Toronto for the Budget Analyst position with Toronto Paramedic Services, Job ID 62523. I earned my Master of Business Analytics from Edith Cowan University in Australia and my Integrated Master of Business Administration from Atmiya University in India. I am motivated by the opportunity to support accountable emergency-service operations through accurate financial information, performance measures, research, and management reporting.

As a Data Intern at AYLA Solutions in Australia in 2025, I gathered and documented business, data, and reporting requirements and translated stakeholder questions into structured analytical needs and KPI definitions. I supported SQL extraction and validation, prepared advanced Excel reports, and contributed dashboard insights for performance tracking. Through Agile planning and reviews, I communicated progress and findings and maintained clear analytical documentation. This experience strengthened my ability to turn structured data into accurate, decision-focused reporting while collaborating with stakeholders.

My financial and workforce projects provide concrete evidence of relevant analytical thinking. In e-commerce analytics, I established recognized-revenue rules that exclude pending, refunded, and cancelled activity and analyzed monthly revenue, customer spend, order frequency, product performance, and payment methods. I added repeatable SQL validation and GitHub Actions checks before translating findings into recommendations and Power BI reporting plans. A workforce project examined headcount, compensation, performance, hiring, attendance, and tenure. The Bank of Baroda project used Excel and SQL to analyze customer transactions and recommend service changes.

My earlier roles at Trans Globe Education and Arihant Investment in India strengthened my administrative reporting, workflow coordination, client communication, accurate records management, and careful handling of confidential information. Relevant graduate coursework includes Analytics and Business Decision Making, Databases and Business Intelligence, People Analytics, Supply Chain Analytics, and Project Management. My NISM Series XII – Securities Markets Foundation credential adds formal securities-market knowledge.

I would bring advanced Excel, SQL analysis, validation discipline, confidentiality, and a strong learning mindset while developing specialized municipal operating and capital budget, variance forecasting, GAAP, SAP/S4, Ariba, payroll, and procurement knowledge. I am ready to learn from Finance specialists and provide reliable analysis.

Thank you for considering my application. I welcome a discussion about this opportunity.

Best regards,

Jainali Mehta
