Hiring Manager, First National Financial LP — Toronto, Ontario

Dear Hiring Manager,

I am applying for the Operations Analyst II, Risk Management position with First National Financial LP. I currently live in Toronto, Canada; my Master of Business Analytics was completed at Edith Cowan University in Australia, and my Integrated Master of Business Administration was completed at Atmiya University in India. I offer an early-career foundation in SQL, advanced Excel, data-quality validation, relational modelling, reporting, business requirements, and accurate documentation.

As a Data Intern at AYLA Solutions in Australia, I gathered and documented business and reporting requirements, translated stakeholder questions into structured analytical tasks, supported SQL extraction and validation, and prepared advanced Excel reports and dashboard insights. Agile sprint planning and reviews strengthened how I communicate progress, maintain documentation, and contribute to quality-focused work.

My published projects demonstrate the control-minded analysis this position requires. In E-Commerce Sales Analytics, I linked customers, products, orders, line items, and payments using keys, uniqueness rules, integrity checks, and controlled revenue-recognition logic. My Healthcare Patient & Hospital Analytics project covers billing and insurance claims with automated validation, while HR Analytics models departments, employees, salaries, performance, and attendance. Across the repositories, I used repeatable SQL checks and GitHub Actions, documented assumptions, investigated data relationships, and translated validated findings into operational recommendations and Power BI dashboard plans.

Earlier roles in India strengthened my workflow coordination, reporting support, client communication, and discretion with confidential records. Coursework in Business Systems Analysis, Databases and Business Intelligence, Business Process Management, Analytics and Business Decision Making, Enterprise Architecture, and Project Management further developed my ability to connect requirements, processes, data, and controls.

First National's leadership in Canadian mortgage lending and its values of trust, autonomy, accountability, teamwork, and continuous learning strongly appeal to me. My database work has used PostgreSQL rather than SQL Server Management Studio, and my Power BI experience currently covers dashboard planning. I would bring careful analysis, reliable reporting, clear communication, and a strong commitment to learning First National's systems, Microsoft-specific tools, QA methodology, and risk-control environment.

Thank you for your time and consideration. I look forward to discussing how I could contribute to your team.

Best regards,

Jainali Mehta
