Hiring Manager, Capital One Canada — Toronto, Ontario

Dear Hiring Manager,

I am applying for the Associate, Strategy Analyst - New Grad 2026 position with Capital One Canada. I currently live in Toronto, Canada; my Master of Business Analytics was completed at Edith Cowan University in Australia, and my Integrated Master of Business Administration was completed at Atmiya University in India. I offer an early-career foundation in SQL, advanced Excel, analytical problem-solving, relational modelling, KPI analysis, data validation, and decision-focused reporting.

As a Data Intern at AYLA Solutions in Australia, I gathered and documented business and reporting requirements, translated stakeholder questions into structured analytical tasks, supported SQL extraction and validation, and prepared advanced Excel reports and dashboard insights for performance tracking. Participating in Agile sprint planning and reviews strengthened my ability to communicate progress, maintain accurate documentation, and contribute reliably within a team.

My E-Commerce Sales Analytics project is especially relevant to strategy work. I built a PostgreSQL model connecting customers, products, orders, line items, and payments; defined recognized-revenue rules; and analyzed customer spend, order frequency, product rankings, monthly revenue, and payment methods. I converted validated findings into business recommendations and Power BI dashboard planning. My healthcare and HR projects further demonstrate CTEs, segmentation, rankings, running totals, lag comparisons, window functions, repeatable validation, and the discipline to separate evidence, assumptions, and recommendations.

Earlier roles in India strengthened my workflow coordination, market research support, client communication, and discretion with confidential records. Coursework in Analytics and Business Decision Making, Machine Learning, Databases and Business Intelligence, Supply Chain Analytics, and People Analytics gave me additional grounding in using data to evaluate business choices.

Capital One's mission to change banking for good, its use of analytics to improve customer and financial outcomes, and the hands-on Canada Analyst Development Program strongly appeal to me. I would bring curiosity, analytical discipline, clear communication, and a willingness to learn new tools. I recognize that the posting identifies 2026 graduates; my master's degree was completed in 2025, and I would welcome consideration if the intake can accommodate an adjacent graduate cohort.

Thank you for your time and consideration. I look forward to discussing how I could contribute to your team.

Best regards,

Jainali Mehta
