Hiring Manager

City of Toronto
Metro Hall, Toronto, ON

Dear Hiring Manager,

I currently live in Toronto and am applying to the City of Toronto for the Business Analyst position supporting the Payroll Modernization Project, Job ID 65822. I earned my Master of Business Analytics from Edith Cowan University in Australia and my Integrated Master of Business Administration from Atmiya University in India. I am motivated by the opportunity to improve payroll processes, data integrity, reporting, and service delivery. My relevant graduate coursework includes Business Systems Analysis, Business Process Management, People Analytics, Project Management, and Enterprise Architecture.

In 2025, I worked as a Data Intern at AYLA Solutions in Australia. I gathered and documented business, data, and reporting requirements and translated stakeholder questions into structured analytical needs. I supported SQL-based extraction and validation, prepared advanced Excel reports, and contributed dashboard insights for performance monitoring. Through Agile planning and reviews, I communicated progress and maintained documentation.

My workforce analytics project provides relevant employee-data evidence: I modelled departments, employees, salaries, performance reviews, and attendance, then analyzed headcount, compensation, performance, attendance, hiring, and tenure. My e-commerce project adds financial and transaction analysis through documented revenue-recognition rules, payment KPIs, and data-quality checks. Across the portfolio, I used PostgreSQL, SQL, repeatable validation, AI-assisted recommendations, and structured Power BI dashboard planning to convert complex data into decision-focused reporting.

My earlier employment was also outside Canada: I worked as a Support Executive at Trans Globe Education in India from 2022 to 2023 and as an Administrative Executive at Arihant Investment in India from 2020 to 2021. These roles developed my workflow coordination, administrative reporting, records management, client communication, and confidential information handling. My Business Analysis & Process Management credential further reinforces my requirements and process foundation.

The Strategic Enterprise Integration & Modernization Division's focus on reliable data, operational efficiency, and user-centred public service is meaningful to me as a Toronto resident entering the Canadian job market. I would welcome the opportunity to contribute disciplined requirements documentation, data validation, analytical reporting, and stakeholder support while developing deeper enterprise transformation knowledge.

Thank you for considering my application. I welcome the opportunity to discuss my fit for this important City project.

Best regards,

Jainali Mehta
