Hiring Manager
General Application
Toronto, ON

Dear Hiring Manager,

I am applying for the Business Analyst / Data Analyst position with General Application. I recently completed a Master of Business Analytics at Edith Cowan University in Australia and previously completed an Integrated Master of Business Administration at Atmiya University in India. I am beginning my analytics career in Toronto with strengths in PostgreSQL, SQL, advanced Excel, Power BI, reporting, and requirements analysis.

As a Data Intern at AYLA Solutions in Australia, I supported SQL-based data extraction, advanced Excel reporting, and dashboard insights for business performance tracking. I also gathered and documented reporting requirements and participated in Agile sprint planning and review sessions. This experience taught me to connect stakeholder questions with accurate data and clear analytical outputs.

My portfolio extends that foundation through reproducible analytics projects. I built PostgreSQL models for e-commerce, healthcare, and workforce analysis and wrote queries using joins, CTEs, rankings, segmentation, and window functions. Repeatable validation and GitHub Actions support the reliability of this work, while the analysis demonstrates how I structure data and define decision-relevant KPIs.

My graduate study in Business Systems Analysis, Databases and Business Intelligence, and Business Process Management strengthened my ability to examine workflows, clarify requirements, and connect technical findings with organizational priorities. Earlier roles at Trans Globe Education and Arihant Investment also developed my accuracy, confidential record handling, workflow coordination, and client communication.

I am drawn to General Application because the opportunity combines careful data analysis, practical business problem-solving, and collaborative support for evidence-based decisions. I would welcome the opportunity to contribute careful analysis, clear documentation, and dependable stakeholder support while continuing to grow as an analyst.

Thank you for your time and consideration. I look forward to discussing how I could contribute to your team.

Best regards,

Jainali Mehta
