Hiring Manager

University of Toronto
University Human Resources
VP-People, Finance & Digital Services
St. George Campus, Toronto, ON

Dear Hiring Manager,

I am applying for the Special Projects Consultant position (Req ID 49613) with University Human Resources. I offer an early-career combination of project support, business analysis, reporting, research, and careful administration. I completed a Master of Business Analytics at Edith Cowan University in Australia after earning an Integrated Master of Business Administration at Atmiya University in India, and I now reside in Toronto.

As a Data Intern at AYLA Solutions in Australia, I gathered and documented business and reporting requirements, translated stakeholder questions into structured analytical tasks, supported SQL extraction and validation, and prepared advanced Excel reports and dashboard insights. Participation in Agile sprint planning and reviews strengthened my ability to clarify deliverables, communicate progress, maintain documentation, and connect analytical work with business priorities.

My workforce analytics project provides directly relevant HR subject-matter evidence. I built a relational model covering departments, employees, salaries, performance reviews, and attendance; defined headcount, performance, attendance, hiring, and tenure measures; and documented validated insights and recommendations. The repository includes repeatable checks and completed Power BI planning for leadership-focused KPIs and visuals. In separate survey research, I designed a Google Forms questionnaire, analyzed responses in Excel using formulas, filters, pivot tables, percentages, and charts, and synthesized adoption barriers and recommendations.

Earlier roles at Trans Globe Education and Arihant Investment strengthened my workflow coordination, administrative reporting, stakeholder communication, accurate record maintenance, and discretion with confidential business information. Coursework in Project Management, People Analytics, Business Systems Analysis, and Business Process Management further developed my understanding of structured planning, stakeholder needs, implementation, and continuous improvement.

I am drawn to the role because University Human Resources combines disciplined project delivery, confidential executive support, employee-focused initiatives, and evidence-based service improvement. I would bring reliable follow-through, analytical discipline, clear writing, responsiveness, and sound respect for confidentiality while learning the University's governance and project environment from experienced colleagues.

Thank you for your time and consideration. I look forward to discussing how I could contribute to your team.

Best regards,

Jainali Mehta
