Hiring Manager

City of Toronto
Toronto, ON

Dear Hiring Manager,

I am applying for the Business Analyst PF&R position, Job ID 64360, with the City of Toronto. As a Toronto-based Master of Business Analytics graduate, I am motivated by the opportunity to support Parks and Recreation through structured requirements, process analysis, operational improvement, and technology-enabled change. My background combines Australian Data Intern experience with graduate study in Business Systems Analysis, Business Process Management, Project Management, and Enterprise Architecture.

As a Data Intern at AYLA Solutions in Australia, I gathered and documented business, data, and reporting requirements and translated stakeholder questions into structured analytical needs. I supported SQL-based extraction and validation, prepared advanced Excel reports, and contributed dashboard insights for performance tracking. Participation in Agile planning and review sessions strengthened my ability to communicate progress, coordinate analytical work, and maintain accurate requirements and project documentation.

My portfolio demonstrates how I approach operational questions through defined processes, documented assumptions, validated data, and decision-focused reporting. Across e-commerce, workforce, and healthcare projects, I modelled interconnected business information, established operational and financial KPIs, evaluated data-quality conditions, and converted SQL findings into recommendations. The workforce project addresses headcount, compensation, performance, attendance, and tenure, while each repository includes repeatable validation, AI-assisted analysis, and structured Power BI dashboard planning.

Earlier roles at Trans Globe Education and Arihant Investment developed my workflow coordination, administrative reporting, records management, client communication, and confidential information handling. My Business Analysis & Process Management credential further reinforces my commitment to requirements and process-focused work. These experiences would support careful collaboration with City stakeholders, project teams, and technical resources.

The City of Toronto's focus on inclusive public service and Parks and Recreation transformation is especially meaningful to me as a Toronto resident. I would welcome the opportunity to contribute clear documentation, reliable analysis, thoughtful recommendations, and dependable stakeholder support to the transformation program.

Thank you for your time and consideration. I look forward to discussing how I could contribute to this work.

Best regards,

Jainali Mehta
