Hiring Manager

Scotiabank, Canadian Banking
Branch Network Planning and Business Analysis
Toronto, ON

Dear Hiring Manager,

I am applying for the Branch Network Planning and Business Analysis opportunity (Requisition 269040) with Scotiabank in Toronto. I completed a Master of Business Analytics at Edith Cowan University in Australia after earning an Integrated Master of Business Administration at Atmiya University in India, and I now reside in Toronto. I offer an early-career foundation in project coordination, advanced Excel reporting, PowerPoint, business analysis, organized documentation, and stakeholder communication.

As a Data Intern at AYLA Solutions in Australia, I gathered and documented business and reporting requirements, translated stakeholder questions into structured analytical tasks, supported SQL extraction and validation, and prepared advanced Excel reports and dashboard insights. Through Agile sprint planning and reviews, I communicated progress and maintained accurate analytical documentation. This experience taught me to consolidate inputs, track work carefully, and present information in a form that supports decisions.

My Bank of Baroda Customer Behaviour Analysis provides directly relevant banking evidence. I used Excel and SQL to clean and analyze customer transaction patterns, visualize trends, and present recommendations for customer engagement and service delivery. My published E-Commerce Sales Analytics project further examines customer spend, order frequency, revenue, and payment methods through a controlled PostgreSQL model. HR Analytics demonstrates structured workforce reporting across headcount, compensation, performance, attendance, hiring, and tenure. Together, these projects show my ability to organize data, identify patterns, validate findings, and communicate practical recommendations.

Earlier roles at Trans Globe Education and Arihant Investment strengthened my workflow coordination, reporting support, client communication, record accuracy, and confidential information handling. My NISM Series XII Securities Markets Foundation credential and coursework in Business Systems Analysis, Analytics and Business Decision Making, Business Process Management, Project Management, and Supply Chain Analytics add relevant business and planning context.

I am drawn to Scotiabank's purpose of supporting every future and to the practical impact of branch-network decisions on customers and communities. I would bring initiative, accurate tracking, clear materials, thoughtful analysis, and dependable follow-through while learning the Bank's Canadian retail network, real-estate processes, risk culture, and business-case standards.

Thank you for your time and consideration. I look forward to discussing how I could contribute to your team.

Best regards,

Jainali Mehta
