RE: Analyst, Performance Improvement & Operational Excellence, MNP

Dear Hiring Manager,

I am applying for the Analyst position with MNP's Performance Improvement & Operational Excellence team. I completed a Master of Business Analytics at Edith Cowan University in Australia and now live in Toronto. My foundation combines operational analysis, requirements gathering, advanced Excel and SQL, KPI thinking, process documentation, and client-focused coordination. I am particularly drawn to work that begins with an ambiguous business problem and turns evidence into practical improvements that people can implement.

At AYLA Solutions in Australia, I gathered and documented business and reporting requirements, supported SQL-based extraction and validation, prepared advanced Excel reports, and contributed insights for business performance tracking. Agile planning and review sessions strengthened my ability to clarify needs, organize work, communicate progress, and maintain documentation others can use. Those habits align with MNP's need for careful project execution, concise reporting, and responsive collaboration with clients and stakeholders.

My project work demonstrates breadth across the business disciplines highlighted in the posting. In E-Commerce Sales Analytics, I defined recognized-revenue logic and examined customer spend, order frequency, product performance, monthly revenue, and payment methods. In HR Analytics, I evaluated headcount, compensation, performance, attendance, hiring patterns, and tenure. An online GST-filing research project combined survey design with Excel formulas, filtering, pivot tables, percentages, and charts to identify adoption patterns and barriers and document recommendations. Together, these projects required both quantitative discipline and clear interpretation for business decisions.

Earlier roles at Trans Globe Education and Arihant Investment developed my client service, process follow-up, research, reporting support, and confidential record handling. Graduate coursework in Business Process Management, Supply Chain Analytics, People Analytics, Analytics and Business Decision Making, and Project Management expanded my ability to examine operational issues from multiple perspectives.

I have not yet earned Lean Six Sigma certification or delivered a formal management-consulting engagement. I would bring the humility and learning discipline MNP requests while contributing immediately through structured analysis, careful documentation, dependable follow-through, and professional communication. MNP's focus on Canadian mid-market organizations is especially compelling because the work combines measurable performance improvement with hands-on implementation rather than stopping at recommendations.

Thank you for considering my application. I would welcome the opportunity to discuss how my analytical foundation and implementation-minded approach could contribute to MNP's clients and consulting team.

Best regards,
Jainali Mehta
