RE: Vendor Operations and Client Relations Coordinator, RecoveryHub

Dear Hiring Manager,

I am applying for the Vendor Operations and Client Relations Coordinator position with RecoveryHub, part of the CanCap Group. I completed a Master of Business Analytics at Edith Cowan University in Australia and now live in Toronto. My background combines external-party coordination, client communication, operational reporting, confidential record handling, and performance analytics. This early-career foundation is relevant to supporting RecoveryHub's vendor network and client-delivery standards.

At Trans Globe Education, I managed accurate client documentation and coordinated application and process updates between students and institutions. I also supported workflow management, reporting, client communication, and market research. This work developed my ability to keep external parties informed, maintain reliable records, and communicate next steps clearly.

At AYLA Solutions in Australia, I gathered and documented business and reporting requirements, supported SQL extraction and validation, prepared advanced Excel reports, and contributed performance-tracking insights. My published e-commerce and workforce projects further demonstrate how I define KPIs, analyze trends and rankings, validate underlying data, and convert findings into AI-assisted recommendations and Power BI scorecard plans. A Bank of Baroda customer-behaviour project also involved Excel and SQL analysis followed by recommendations for customer engagement and service delivery.

Earlier experience at Arihant Investment strengthened my attention to confidential client records, data accuracy, daily operational support, and professional communication. Coursework in Business Process Management, Analytics and Business Decision Making, Business Systems Analysis, and Project Management adds grounding in process controls, structured judgment, and evidence-based recommendations.

This would be my first role in repossession vendor operations, contract review, and formal compliance work. I would bring a transparent learning mindset alongside strong documentation, reporting, coordination, and analytical habits. RecoveryHub's emphasis on thoughtful communication, smart escalation, operational efficiency, and professional growth is especially compelling, and I would welcome the opportunity to develop into a dependable bridge between RecoveryHub, its field partners, and its clients.

Thank you for your consideration. I would welcome the opportunity to discuss how my communication, analytical foundation, and disciplined follow-through could support RecoveryHub.

Best regards,
Jainali Mehta
