**RE: Junior Sales Representative, VV Vantage Consulting**

Dear Hiring Manager,

I am applying for the Junior Sales Representative position with VV Vantage Consulting in Etobicoke. I completed a Master of Business Analytics at Edith Cowan University in Australia and now live in Toronto. My background combines direct client support, accurate customer-record management, market research, and data-informed recommendations—a strong foundation for learning your telecommunications offerings and helping customers navigate service decisions with clarity.

As a Support Executive at Trans Globe Education in India, I supported client communication, maintained accurate documentation, and coordinated application and process updates with students and institutions. That work required patience, careful listening, reliable follow-up, and the ability to explain next steps while protecting the quality of each customer record. At Arihant Investment, I also supported daily operations and client communication while handling confidential records with close attention to detail.

My analytical work adds a practical customer-insight dimension. In a Bank of Baroda project, I analyzed transaction patterns with Excel and SQL and presented recommendations for customer engagement and service delivery. My Online GST Filing Adoption Research used a Google Forms survey and Excel analysis to identify adoption patterns and barriers. These projects trained me to look beyond a surface request, understand what affects a customer's decision, and communicate recommendations in a structured way.

At AYLA Solutions in Australia, I gathered business and reporting requirements, supported SQL extraction and validation, prepared advanced Excel reports, and contributed performance insights. Agile planning and reviews strengthened my teamwork, adaptability, and progress communication. I would bring the same disciplined preparation to product training: learn the features and service standards, clarify customer needs, explain suitable options accurately, document interactions, and follow through on commitments.

My verified experience is in client support, administration, and analytics rather than quota-carrying telecommunications sales. Your paid onboarding and product training therefore make this opportunity especially compelling. VV Vantage Consulting's emphasis on integrity, accountability, customer success, and people-focused development matches how I want to build a sales career: earn trust, represent the product honestly, maintain service quality, and improve through coaching and measurable feedback.

Thank you for considering my application. I would welcome the opportunity to discuss how my customer-support experience, communication discipline, record accuracy, and willingness to learn could support VV Vantage Consulting's growth in Etobicoke.

Best regards,  
Jainali Mehta
