**RE: Project Coordinator, WT Partnership**

Dear Hiring Manager,

I am applying for the Project Coordinator position with WT Partnership in Toronto. I completed a Master of Business Analytics at Edith Cowan University in Australia and now live in Toronto. The role's combination of project-data administration, reporting, cross-functional follow-up, office support, and marketing coordination aligns with my verified experience in analytics, accurate record maintenance, workflow support, client communication, and market research.

At AYLA Solutions in Australia, I gathered and documented business and reporting requirements, supported SQL-based extraction and validation, prepared advanced Excel reports, and contributed performance insights. Agile planning and reviews strengthened my ability to clarify inputs, communicate progress, maintain documentation, and support a structured delivery cycle. Those habits apply directly to maintaining reliable project data, current documentation, and decision-ready stakeholder reporting.

My published projects reinforce the data-integrity and reporting discipline required for WT's Polaris processes. Across e-commerce, healthcare, and workforce models, I connected related records, documented business rules, checked completeness and consistency, tracked financial, service, and people measures, and added repeatable validation through GitHub Actions. Each project also includes KPI and Power BI dashboard planning. Although these are analytical projects rather than ERP administration, they demonstrate how I organize linked information and turn it into controlled, decision-focused reporting.

At Trans Globe Education, I maintained client documentation, coordinated process updates with students and institutions, and supported administrative reporting, workflow management, client communication, and market research. At Arihant Investment, I supported daily office operations while handling data entry and confidential client records. Together, these roles developed the reliability, professionalism, and attention to detail needed in a position that moves between project coordination, reception, office administration, and marketing support.

My verified experience does not yet include Salesforce or Polaris, invoicing and expense systems, staff training, facilities coordination, or construction consulting. I would approach those areas through WT's procedures and coaching: learn the project lifecycle and data definitions, validate entries before relying on them, document issues clearly, follow up on outstanding requirements, and seek feedback early. WT's Australian origins and expanding Canadian operations make its cross-regional environment especially meaningful given my Australian education and internship foundation.

Thank you for considering my application. I would welcome the opportunity to discuss how my reporting, data-quality, administrative-support, and stakeholder-coordination foundation could contribute to WT's Toronto office and North American growth.

Best regards,  
Jainali Mehta
