RE: Analyst/Consultant, Fraud Strategy or AML — Deloitte Canada

Dear Hiring Manager,

I am applying for Deloitte Canada's Analyst/Consultant, Fraud Strategy or Anti-Money Laundering New Grad 2027 position, reference 134815. I completed a Master of Business Analytics at Edith Cowan University in Australia and now live in Toronto. My foundation combines structured problem-solving, qualitative and quantitative research, financial-services exposure, requirements analysis, and evidence-based reporting. I am drawn to financial crime and the team's wider mandate across enterprise strategy, governance, controls, analytics, and transformation.

At AYLA Solutions in Australia, I gathered and documented business and reporting requirements, supported SQL-based extraction and validation, prepared advanced Excel reports, and contributed performance insights. Agile planning and reviews strengthened my ability to clarify ambiguous questions, organize inputs, communicate progress, and maintain current documentation. This experience taught me to connect analytical work with the decisions stakeholders need to make.

My academic and portfolio projects provide relevant risk-adjacent evidence. For Bank of Baroda, I analyzed customer transaction patterns using Excel and SQL and presented engagement and service recommendations. In E-Commerce Sales Analytics, I modelled orders and payments, defined recognized-revenue rules that excluded pending, refunded, and cancelled activity, investigated customer and payment patterns, and added repeatable validation. My online GST-filing research combined survey design and Excel analysis to identify adoption patterns and barriers. Together, these projects demonstrate disciplined analysis, control-minded definitions, and recommendations linked clearly to evidence.

At Trans Globe Education, I supported market research, reporting, workflows, client documentation, and stakeholder updates. At Arihant Investment, I supported operations and client communication while maintaining confidential records accurately. My NISM Series XII Securities Markets Foundation credential adds introductory financial-markets context. I do not yet have direct fraud, AML, compliance, controls-testing, or consulting experience; because the posting treats that exposure as beneficial rather than mandatory, I would bring intellectual honesty, a strong learning discipline, and careful evidence handling while building domain expertise.

Thank you for considering my application. I would welcome the opportunity to discuss how my analytical foundation, financial-services exposure, research discipline, and stakeholder communication could support Deloitte clients in protecting value, strengthening trust, and making better decisions.

Best regards,
Jainali Mehta
