**RE: Global Benefits & Wellbeing Analyst (3 Month Contract), Docebo**

Dear Hiring Manager,

I am applying for the Global Benefits & Wellbeing Analyst three-month contract with Docebo. I completed a Master of Business Analytics at Edith Cowan University in Australia and now live in Toronto. I offer an entry-level combination of advanced Excel reporting, data validation, workforce analytics, confidential-record handling, documentation coordination, client support, and AI-assisted analysis. These strengths align with the role's focus on accurate benefits operations and clear employee care.

At AYLA Solutions in Australia, I gathered and documented business and reporting requirements, supported SQL-based extraction and validation, prepared advanced Excel reports, and contributed reporting insights for performance tracking. Agile planning and review sessions strengthened my ability to clarify requests, organize inputs and expected outputs, communicate progress, respond to feedback, and maintain current documentation. I learned to double-check source data and definitions before relying on a result.

My published HR Analytics project demonstrates focused interest in people data. I built a normalized PostgreSQL model spanning departments, employees, salaries, performance reviews, and attendance, then analyzed headcount, compensation, performance, hiring, and tenure. I used relational integrity rules, repeatable validation, and GitHub Actions checks before developing AI-assisted recommendations and Power BI dashboard plans. Healthcare Patient & Hospital Analytics adds experience analyzing billing status, treatment costs, and insurance-claim data with structured checks.

Earlier roles add the service and administrative discipline needed in a benefits team. At Trans Globe Education, I managed client documentation, coordinated application and process updates with students and institutions, and supported recurring reporting and workflows. At Arihant Investment, I handled data entry and maintained accurate, confidential client records while supporting daily operations and communication. These experiences taught me to provide clear updates, protect sensitive information, and escalate questions rather than guess.

Dayforce and formal benefits and leave administration would be new to me. I would learn them through Docebo's documented processes, mentorship, careful note-taking, supervised practice, and reconciliation checklists. I am particularly drawn to Docebo's AI-first learning culture and the opportunity to use approved tools responsibly while remaining accountable for every figure, record, and employee communication.

Thank you for considering my application. I would welcome the opportunity to contribute to Docebo's Global Total Rewards team.

Best regards,  
Jainali Mehta
