RE: Project Analyst, TD Securities

Dear Hiring Manager,

I am applying for the Project Analyst position within TD Securities' VCP group. I completed a Master of Business Analytics at Edith Cowan University in Australia and now live in Toronto. My early-career foundation combines project and reporting support, operational analysis, advanced Excel and SQL, requirements documentation, workflow coordination, data validation, and careful communication.

As a Data Intern at AYLA Solutions in Australia, I gathered and documented business and reporting requirements, clarified intended outputs, supported SQL-based extraction and validation, and prepared advanced Excel reports for performance tracking. Through Agile sprint planning and reviews, I communicated progress and reporting insights and maintained analytical documentation. That experience taught me to connect a request to its business purpose, keep work visible, and verify information before it becomes a decision input.

My analytical work also demonstrates the research and reporting discipline this position requires. In E-Commerce Sales Analytics, I defined recognized revenue, analyzed customer and operational KPIs, tested outputs through relational controls and repeatable validation, and documented recommendations grounded in the results. A Bank of Baroda project involved cleaning and interpreting customer transaction patterns in Excel and SQL, visualizing trends, and presenting recommendations. My Online GST Filing Adoption Research required designing a survey, organizing responses, using Excel formulas and pivot tables, and documenting adoption barriers and recommendations.

At Trans Globe Education, I maintained client documentation, coordinated application and process updates with students and institutions, and supported reporting, workflows, research, and follow-through. At Arihant Investment, I handled confidential business records and supported daily operations and client communication. These roles strengthened the discretion, organization, responsiveness, and service mindset needed when several people depend on timely, accurate information.

I recognize that my background is earlier-career than the requested three to five years and does not yet include ownership of regulated capital-markets projects. I am nevertheless drawn to TD Securities because the role combines coordination, operational analysis, change support, risk-minded execution, and clear upward reporting. I would bring disciplined follow-through, honest escalation, reliable documentation, and the judgment to work within established controls while learning the VCP environment.

Thank you for your time and consideration. I look forward to discussing how I could contribute to your team.

Best regards,
Jainali Mehta
