RE: Associate Consultant, Launch Program 2027, Mastercard

Dear Hiring Manager,

I am applying for Mastercard's Associate Consultant, Launch Program 2027 in Toronto, with particular interest in the Business Experimentation track. I completed a Master of Business Analytics at Edith Cowan University in Australia and now live in Toronto. Mastercard's combination of data-driven consulting, payments innovation, structured learning, and client impact strongly matches the analytical and business career I want to build.

As a Data Intern at AYLA Solutions in Australia, I gathered and documented business and reporting requirements, supported SQL-based extraction and validation, prepared advanced Excel reports, and contributed dashboard insights for performance tracking. Agile planning and review sessions strengthened my ability to clarify the business question, organize analytical work, communicate progress, and maintain accurate documentation. This experience reinforced the importance of connecting reliable analysis with a decision stakeholders need to make.

My e-commerce project provides direct evidence of customer and payment analysis. I modelled customers, products, orders, line items, and payments; established recognized-revenue rules; and used SQL to examine spend, order frequency, product rankings, monthly trends, and payment methods before documenting validated findings and recommendations. A Bank of Baroda project adds customer-behaviour analysis using Excel and SQL, while a survey project examined small-business adoption patterns and barriers through Google Forms and Excel. Together, these projects show my ability to structure a question, prepare evidence, identify patterns, and communicate practical conclusions.

My broader portfolio spans healthcare and workforce analytics, using CTEs, rankings, running totals, lag comparisons, integrity checks, and repeatable validation. I used AI to assist interpretation while grounding findings in SQL outputs and created Power BI KPI and dashboard plans. Earlier roles at Trans Globe Education and Arihant Investment developed my client communication, market-research support, workflow coordination, confidential record handling, and attention to data accuracy. These experiences have prepared me to learn new industries quickly and contribute carefully within a small team.

I have not yet run controlled client experiments or worked in management consulting, so I would bring humility alongside strong SQL, Excel, research, and structured problem-solving foundations. I am especially motivated by the Launch Program's mentorship and development model and by Mastercard's emphasis on teamwork, integrity, meaningful recommendations, and secure handling of information. I would welcome the opportunity to help Advisors & Consulting Services turn complex client questions into clear, evidence-based action.

Thank you for your consideration. I look forward to discussing how my analytical discipline, business curiosity, and learning agility could contribute to Mastercard.

Best regards,
Jainali Mehta
