RE: Banking Advisor, National Bank

Dear Hiring Manager,

I am applying for the Banking Advisor position with National Bank, and a current employee has offered to refer my application. I completed a Master of Business Analytics at Edith Cowan University in Australia and now live in Toronto. Although I have not yet held a Canadian banking-advisory role, I bring verified experience in client communication, accurate and confidential records, process coordination, financial and customer analysis, and learning unfamiliar work through structured questions and careful follow-through.

At Trans Globe Education, I managed client documentation and records and coordinated application and process updates with students and institutions. That work required clear communication, attention to individual circumstances, reliable follow-up, and consistent records. Earlier, at Arihant Investment, I supported client communication and daily operations while maintaining accurate, confidential business data. These experiences provide a practical foundation for listening carefully, explaining next steps, and treating every interaction with discretion and respect.

My analytical background adds disciplined questioning and evidence-based judgment. At AYLA Solutions, I gathered business and reporting requirements, supported SQL extraction and validation, prepared advanced Excel reports, and contributed performance insights while participating in Agile planning and reviews. In a Bank of Baroda customer-behaviour project, I used Excel and SQL to examine transaction patterns and present recommendations for customer engagement and service delivery. These experiences taught me to clarify a need before recommending an answer and to check information before communicating it.

National Bank's structured development path is especially compelling because I want to build product knowledge through training and daily collaboration with investment, mortgage, and insurance specialists. I would bring humility about what I still need to learn, confidence in asking precise questions, and the discipline to refer a need rather than guess. I am prepared to pursue the mutual fund licence required for progression, subject to the role's training and eligibility process.

National Bank's values of partnership, agility, empowerment, and inclusion match how I want to develop: by earning trust one interaction at a time, learning from specialists, and following compliance, security, and risk procedures without shortcuts. I would welcome the opportunity to discuss how my client-support foundation, digital literacy, financial-analysis interest, and learning agility could contribute as a Banking Advisor.

Thank you for your time and consideration. I look forward to discussing how I could contribute to your team.

Best regards,
Jainali Mehta
