RE: Opportunity Creation Associate, Klick

Dear Hiring Manager,

I am applying for the Opportunity Creation Associate position with Klick. I completed a Master of Business Analytics at Edith Cowan University in Australia and now live in Toronto. Klick's Growth team stands out to me because it combines evidence-based research, precise coordination, client service, and responsible use of AI in life sciences. I would bring an early-career foundation in market research, analytical reporting, data quality, client communication, workflow coordination, and AI-assisted insight development.

At AYLA Solutions in Australia, I gathered and documented business and reporting requirements, supported SQL-based extraction and validation, prepared advanced Excel reports, and contributed performance-tracking insights. Agile planning and reviews strengthened how I clarify requests, synthesize usable outputs, communicate progress, and keep documentation review-ready.

At Trans Globe Education, I supported market research and client communication, maintained accurate records, and coordinated application and process updates with students and institutions. That experience required responsive follow-through and careful information handling—useful foundations for monitoring requests, keeping prospect activity current, and ensuring timely stakeholder handoffs. At Arihant Investment, I further developed reliable data entry, confidential record maintenance, and operational support.

My portfolio demonstrates both healthcare interest and commercial analysis. In Healthcare Patient & Hospital Analytics, I examined appointments, treatment costs, billing, clinician workload, and insurance claims before producing AI-assisted operational insights grounded in validated SQL outputs. My e-commerce project analyzed customer behaviour, product rankings, revenue, and payment methods, while Online GST Filing Adoption Research required survey design, market-oriented analysis, and concise recommendations. Across these projects, I used repeatable validation and documented Power BI planning.

My verified experience does not yet include Salesforce, HubSpot, pharmaceutical-agency work, prospect-database ownership, or senior-leader pitch briefings. I would close that gap by learning Klick's CRM definitions and qualification process, validating required fields and activity history, documenting sources, and seeking review on early backgrounders. My experience with Microsoft Office, Google Workspace, research, client support, and AI-assisted analysis provides a practical base for that development.

Thank you for considering my application. I would welcome the opportunity to discuss how my research discipline, data-quality focus, and collaborative service approach could support Klick's Growth team.

Best regards,
Jainali Mehta
