RE: Analyst/Consultant, Deal Transformation & Post Merger Integration — Deloitte Canada

Dear Hiring Manager,

I am applying for Deloitte Canada's Analyst/Consultant, Deal Transformation & Post Merger Integration — New Grad 2027 position, reference 134482. I completed a Master of Business Analytics at Edith Cowan University in Australia and now live in Toronto. My foundation combines structured business analysis, quantitative and qualitative research, performance reporting, process coordination, and financial-services exposure. I am drawn to DT&PMI because it connects rigorous analysis with operating-model decisions, value creation, and the practical execution of complex transformations.

At AYLA Solutions in Australia, I gathered and documented business and reporting requirements, supported SQL-based extraction and validation, prepared advanced Excel reports, and contributed performance insights. Through Agile planning and review discussions, I learned to clarify ambiguous questions, organize inputs and outputs, communicate progress, and keep analytical documentation current. These are the disciplines I would apply when supporting a client workstream, assessing operations, or translating analysis into an actionable plan.

My projects provide relevant evidence of value-driver and operating-model thinking. In E-Commerce Sales Analytics, I modelled customers, products, orders, line items, and payments; defined recognized-revenue rules; and assessed customer, product, and payment patterns before developing recommendations. In HR Analytics, I examined headcount, compensation, performance, attendance, hiring, and tenure—measures that influence workforce and operating decisions. My online GST-filing research combined survey design and Excel analysis to identify adoption barriers and synthesize practical recommendations. Across this work, I used validation to distinguish reliable findings from assumptions.

At Trans Globe Education, I supported market research, reporting, workflow management, client documentation, and stakeholder updates. At Arihant Investment, I supported back-office operations and client communication while maintaining confidential records accurately. Coursework in Business Systems Analysis, Business Process Management, Project Management, and Enterprise Architecture further developed my understanding of processes, systems, and organizational change. Although I am entering deal transformation without direct M&A execution experience, I would bring intellectual honesty, strong learning discipline, and a careful approach to evidence and deliverables.

Thank you for considering my application. I would welcome the opportunity to discuss how my analytical foundation, process perspective, research discipline, and collaborative working style could support Deloitte clients as they plan and deliver transactions and transformations.

Best regards,
Jainali Mehta
