RE: Coordinator, Development — Vital Infrastructure Property Trust

Dear Hiring Manager,

I am applying for the 12-month Coordinator, Development position with Vital Infrastructure Property Trust. I completed a Master of Business Analytics at Edith Cowan University in Australia and now live in Toronto. My background combines project and workflow coordination, advanced Excel reporting, document control, stakeholder communication, research, and financial-services administration. I am attracted to Vital's focus on healthcare infrastructure and to a role where accurate records, disciplined follow-through, and well-organized project information directly support development decisions.

At AYLA Solutions in Australia, I gathered and documented business and reporting requirements, supported SQL-based extraction and validation, prepared advanced Excel reports, and contributed performance-tracking insights. Agile planning and review discussions strengthened my ability to organize inputs and outputs, communicate progress, and maintain current documentation. This experience developed the detail orientation needed to keep trackers reliable and give project leads clear, timely information.

My earlier roles provide direct administrative evidence. At Trans Globe Education, I maintained client documentation and records, coordinated application and process updates with students and institutions, and supported reporting, workflows, communication, and market research. At Arihant Investment, I handled data entry, documentation, and confidential client records while supporting daily operations. These responsibilities required accuracy, responsiveness, and consistent follow-through across recurring work.

My Healthcare Patient & Hospital Analytics project adds relevant sector context: I modelled appointments, treatments, billing, and claims and analyzed completion, costs, billing status, workload, and insurance activity. E-Commerce Sales Analytics strengthened my ability to track transactions, payments, and status-based revenue rules, while my GST-filing research combined survey design, Excel analysis, and concise recommendations. Together, these projects demonstrate careful handling of financial and operational information.

I have not yet processed development invoices, coordinated RFPs, or worked with municipal planning applications. I would approach those responsibilities with intellectual honesty, strong learning discipline, and the same care I have applied to client records, reporting requirements, data validation, and recurring workflows. Thank you for considering my application. I would welcome the opportunity to support Vital's development team while building practical knowledge of healthcare real estate and municipal approvals.

Best regards,
Jainali Mehta
