RE: Banking Advisor, National Bank

Dear Hiring Manager,

I am applying for the Banking Advisor position (job 34618) at National Bank's Markham branch, and a National Bank employee will refer my application. I completed a Master of Business Analytics at Edith Cowan University in Australia and now live in Toronto. My background combines customer communication, accurate and confidential record handling, process coordination, digital literacy, and a demonstrated ability to learn structured work through questions, feedback, and careful follow-through.

At Trans Globe Education in India, I managed client documentation and records while coordinating application and process updates with students and institutions. The work required clear communication, attention to individual circumstances, organized follow-up, and reliable records. Earlier, at Arihant Investment in India, I supported client communication and daily operations while maintaining accurate, confidential business data. These experiences taught me that a positive client interaction depends on listening carefully, explaining the next step clearly, and protecting the information entrusted to me.

My recent Data Intern experience at AYLA Solutions in Australia strengthened my adaptability and comfort with technology. I gathered and documented requirements, supported SQL extraction and validation, prepared advanced Excel reports, and contributed performance insights. Through Agile planning and review sessions, I learned to ask more precise questions, communicate progress, incorporate feedback, and maintain documentation that others could use. I would apply the same learning discipline to National Bank's applications, ABMs, transaction procedures, and service standards.

I have also developed relevant financial and customer insight through applied work. For a Bank of Baroda customer-behaviour project, I used Excel and SQL to examine transaction patterns and present recommendations for customer engagement and service delivery. My NISM Series XII Securities Markets Foundation credential provides introductory securities-market knowledge. I understand that project work and foundational study are not substitutes for personal-banking experience, so I would learn within National Bank's procedures, seek guidance when needed, and refer clients to qualified colleagues rather than overstep.

National Bank's people-first culture, on-the-job training, collaborative branch team, and emphasis on empathy and digital support strongly match how I want to begin my Canadian banking career. I would welcome the opportunity to contribute dependable service, attention to detail, learning agility, and respectful client communication while developing into a trusted Banking Advisor.

Thank you for your time and consideration. I look forward to discussing how I could contribute to your team.

Best regards,
Jainali Mehta
