RE: Strategic Projects Lead, LexisNexis Legal & Professional

Dear Hiring Manager,

I am applying for the Strategic Projects Lead position with LexisNexis Legal & Professional with the benefit of a personal referral. I completed a Master of Business Analytics at Edith Cowan University in Australia and now live in Toronto. Although I am earlier in my strategy career than the title may suggest, I offer a relevant foundation in structuring analysis, coordinating workflows, and communicating recommendations.

At AYLA Solutions in Australia, I gathered and documented business and reporting requirements, supported SQL extraction and validation, prepared advanced Excel reports, and contributed dashboard insights for performance tracking. Agile planning and reviews taught me to clarify the decision behind a request, organize work visibly, communicate progress, and maintain usable documentation. I would bring those habits to cross-functional initiatives involving Sales, Marketing, and operations.

My work also demonstrates an ability to learn unfamiliar domains and move from evidence to action. In E-Commerce Sales Analytics, I defined recognized-revenue logic, analyzed customer and product segments, validated outputs, and used generative AI to help structure recommendations grounded in the SQL results. In Online GST Filing Adoption Research, I designed a small-business survey and used advanced Excel formulas, filters, pivot tables, percentages, and charts to identify adoption patterns and barriers. The work required me to learn the subject, organize ambiguous information, and communicate practical recommendations rather than stop at description.

Earlier roles at Trans Globe Education and Arihant Investment strengthened my stakeholder communication, market-research support, workflow coordination, confidential record handling, and attention to accuracy. Graduate study in Business Systems Analysis, Business Process Management, Analytics and Business Decision Making, Project Management, and Enterprise Architecture gave me a broader framework for connecting operating needs, data, processes, and implementation choices.

LexisNexis interests me because its legal-information business combines data-driven strategy, responsible AI, and cross-functional execution. I would bring advanced Excel, analytical discipline, clear documentation, and a demonstrated learning mindset. I have not yet used Salesforce professionally, delivered production BI, or held a formal consulting role, and I would approach those areas with transparency and focused learning while contributing from my verified strengths.

Thank you for considering my application. I would welcome a conversation about how my analytical foundation, stakeholder orientation, and ability to learn could support your strategy team.

Best regards,
Jainali Mehta
