RE: Strategic Projects Lead, LexisNexis Legal & Professional

Dear Hiring Manager,

I am applying for the Strategic Projects Lead position with LexisNexis Legal & Professional with the benefit of a personal referral. I completed a Master of Business Analytics at Edith Cowan University in Australia and now live in Toronto. My background connects business requirements, advanced Excel and SQL analysis, market research, stakeholder coordination, and evidence-based recommendations.

At AYLA Solutions in Australia, I gathered and documented business and reporting requirements, supported SQL extraction and validation, prepared advanced Excel reports, and contributed dashboard insights for performance tracking. Agile planning and reviews strengthened my ability to clarify the decision behind a request, organize work visibly, communicate progress, and maintain documentation others could use.

Alongside my employed experience, I have completed genuine project-based freelance work as a developer, architect, and data engineer. Working across build, solution-design, and data responsibilities has given me a broader technical perspective and reinforced my ability to approach unfamiliar problems from multiple angles. That range is relevant to strategic project work, where recommendations must account for business objectives, data quality, implementation choices, and clear communication.

My analytical work demonstrates how I move from evidence to action. In E-Commerce Sales Analytics, I defined recognized-revenue logic, evaluated customer and product performance, validated the outputs, and developed AI-assisted recommendations grounded in SQL results. In Online GST Filing Adoption Research, I designed a small-business survey and used Excel formulas, filters, pivot tables, percentages, and charts to identify adoption patterns and barriers. Earlier roles strengthened my market-research support, workflow coordination, client communication, and record discipline.

LexisNexis interests me because its legal-information business combines data-driven strategy, responsible AI, and cross-functional execution. I would bring analytical discipline, learning agility, clear documentation, and a habit of connecting data with practical recommendations. I would welcome the opportunity to support strategic initiatives across Sales, Marketing, and other stakeholder groups.

Thank you for considering my application. I look forward to discussing my contribution to your strategy team.

Best regards,
Jainali Mehta
