Hiring Manager

City of Toronto
Toronto Public Health
Operations & Business Services
Metro Hall, 55 John Street, Toronto, ON

Dear Hiring Manager,

I currently live in Toronto and am applying for the Payroll Program Assistant 1 position supporting Toronto Public Health, Job ID 65022. I earned my Master of Business Analytics from Edith Cowan University in Australia and my Integrated Master of Business Administration from Atmiya University in India. I am drawn to its focus on workforce information, responsive service, confidential records, reporting, and process improvement.

As a Data Intern at AYLA Solutions in Australia in 2025, I gathered and documented business, data, and reporting requirements and translated stakeholder questions into structured analytical needs. I supported SQL extraction and validation, prepared advanced Excel reports, and contributed dashboard insights for performance tracking. Through Agile planning and reviews, I communicated progress and findings and maintained precise documentation. This experience strengthened my ability to investigate information, check accuracy, organize reporting outputs, and support collaborative deadlines.

My workforce analytics project provides direct practice with structured employee information. I modelled departments, employees, salaries, performance reviews, and attendance and analyzed headcount, compensation, performance, attendance, hiring year, and tenure. I used repeatable validation and documented assumptions, recommendations, and Power BI reporting plans. Additional financial and transaction projects strengthened my ability to work carefully with revenue, payments, customer activity, tables, trends, and data-quality rules.

My earlier roles at Trans Globe Education and Arihant Investment in India are equally relevant to the position's service and administrative responsibilities. I maintained client documentation and accurate records, coordinated process updates with students and institutions, supported reporting and workflow management, responded through ongoing client communication, and handled confidential business information with care. Relevant coursework strengthened my foundation in people analytics, processes, systems, and project delivery.

I would bring accuracy, discretion, organized follow-through, advanced Excel and data skills, and a service-oriented approach while developing specialized knowledge of City payroll operations, SAP, SuccessFactors, collective agreements, and applicable payroll legislation. I am ready to learn established procedures and contribute dependable support to Toronto Public Health.

Thank you for considering my application. I welcome an opportunity to discuss my fit for the position.

Best regards,

Jainali Mehta
