Hiring Manager

Ontario Ministry of Transportation
Integrated Policy and Planning Division
System Optimization Policy Branch
438 University Avenue, Toronto, ON

Dear Hiring Manager,

I currently live in Toronto and am applying for the Senior Policy Advisor position with the Ontario Ministry of Transportation, Job ID 246087. I earned my Master of Business Analytics from Edith Cowan University in Australia and my Integrated Master of Business Administration from Atmiya University in India. I offer an early-career research and analytical foundation relevant to the posting's underfill provision, supported by survey research, trend analysis, stakeholder requirements, project coordination, and evidence-based recommendations.

As a Data Intern at AYLA Solutions in Australia in 2025, I gathered and documented business, data, and reporting requirements and translated stakeholder questions into analytical needs and KPI definitions. I supported SQL extraction and validation, prepared advanced Excel reports, and contributed dashboard insights for performance tracking. Through Agile planning and reviews, I communicated progress and findings and maintained clear analytical documentation. This strengthened my evidence organization and collaborative decision support.

My strongest policy-adjacent evidence is an online GST-filing adoption study of small businesses in Gujarat. I designed and conducted the survey in Google Forms, then cleaned, organized, and analyzed responses in Microsoft Excel using formulas, sorting, filtering, pivot tables, percentages, and charts. I identified adoption patterns and common barriers, documented findings and recommendations, and earned an A grade. Additional PostgreSQL projects strengthened my ability to assess financial and operational indicators, validate evidence, document assumptions, identify trends, and translate analysis into decision-focused recommendations and reporting plans.

Earlier roles at Trans Globe Education and Arihant Investment in India strengthened my market research, workflow coordination, client and institutional communication, accurate records, and confidential-information handling. Coursework in Analytics and Business Decision Making, Supply Chain Analytics, Project Management, Business Process Management, and Enterprise Architecture developed my understanding of interconnected systems, implementation, and organizational impacts.

I am motivated by the branch's focus on integrated mobility, land-use connections, infrastructure optimization, equitable access, and actionable evidence. I would bring disciplined research, concise documentation, analytical curiosity, and a strong learning mindset while developing deeper transportation-policy, legislative, consultation, and government-briefing expertise under experienced leadership.

Thank you for considering my application. I welcome an opportunity to discuss my fit for the position.

Best regards,

Jainali Mehta
