Hiring Manager, Cidel — Toronto, Ontario

Dear Hiring Manager,

I am applying for the Operations Analyst position with Cidel. I currently live in Toronto, Canada; my Master of Business Analytics was completed at Edith Cowan University in Australia, and my Integrated Master of Business Administration was completed at Atmiya University in India. I offer an early-career foundation in advanced Excel, SQL, operational accuracy, financial-record handling, data validation, reporting, and client communication.

As a Data Intern at AYLA Solutions in Australia, I gathered and documented business and reporting requirements, translated stakeholder questions into structured analytical tasks, supported SQL extraction and validation, and prepared advanced Excel reports and dashboard insights. Earlier, as an Administrative Executive at Arihant Investment in India, I handled data entry, documentation, confidential client records, daily operational support, and client communication with close attention to accuracy.

My E-Commerce Sales Analytics project provides the closest technical evidence for transaction-focused operations. I linked customers, orders, line items, products, and payments; applied keys, uniqueness rules, integrity checks, and controlled revenue logic; and analyzed payment and revenue activity. Healthcare Patient & Hospital Analytics adds billing and insurance-claims data, while HR Analytics demonstrates normalized records and repeatable checks. Across the repositories, I documented assumptions, validated relationships and outputs, investigated inconsistencies, and maintained reproducible GitHub Actions checks.

My NISM Series XII – Securities Markets Foundation credential provides additional investment-market context, while graduate coursework in Analytics and Business Decision Making, Databases and Business Intelligence, Business Process Management, and Business Systems Analysis supports my ability to learn controlled operational processes.

Cidel's combination of global private-banking and asset-management capability with personalized boutique service is compelling to me. My background is an adjacent analytical and financial-record foundation rather than direct custody-operations experience. I would bring persistence, careful checking, clear exception communication, and commitment to learning Cidel's operational controls.

Thank you for your time and consideration. I look forward to discussing how I could contribute to your team.

Best regards,

Jainali Mehta
