Hiring Manager

University of Toronto
Department of Computer Science
Faculty of Arts & Science
St. George Campus, Toronto, ON

Dear Hiring Manager,

I am applying for the Graduate Office Assistant position (Req ID 49597) with the Department of Computer Science. I offer verified experience supporting students, clients, and educational institutions through accurate records, application and process updates, administrative reporting, workflow coordination, and careful communication. I completed a Master of Business Analytics at Edith Cowan University in Australia after earning an Integrated Master of Business Administration at Atmiya University in India, and I now reside in Toronto.

At Trans Globe Education in India, I maintained student and client documentation and coordinated application and process updates with students and educational institutions. I also supported administrative reporting, workflow management, client communication, and market research. This experience required accuracy, responsiveness, organized follow-through, and care when communicating information across different stakeholder groups; I would bring these qualities to a busy graduate office.

My analytical background strengthens my ability to organize records and contribute to dependable reporting. At AYL Solutions in Australia, I gathered reporting requirements, supported SQL extraction and validation, prepared advanced Excel reports, and maintained documentation through Agile planning and review sessions. My HR Analytics project required a structured PostgreSQL database, data-quality controls, repeatable validation, and reporting across employee, performance, and attendance records. Separately, I organized and analyzed Google Forms survey responses in Excel using formulas, filters, pivot tables, percentages, and charts.

As an Administrative Executive at Arihant Investment, I handled data entry, documentation, confidential client records, daily operations, and client communication. That experience reinforced discretion, accuracy, and reliable record maintenance. Coursework in Databases and Business Intelligence, Business Systems Analysis, Business Process Management, and Project Management supports careful learning of new academic systems and procedures.

I am drawn to the Graduate Office because the role combines student service, precise academic administration, confidential records, and dependable reporting. I would welcome the opportunity to provide approachable front-line support, respond within established scope, redirect questions appropriately, and learn the Department's graduate procedures and systems with diligence.

Thank you for your time and consideration. I look forward to discussing how I could contribute to your team.

Best regards,

Jainali Mehta
