Hiring Manager

Ministry of the Environment, Conservation and Parks
125 Resources Road, Etobicoke, ON

Dear Hiring Manager,

I currently live in Toronto and am applying to the Ministry of the Environment, Conservation and Parks for the Project Management Coordinator position, Job ID 245895. I earned my Master of Business Analytics from Edith Cowan University in Australia and my Integrated Master of Business Administration from Atmiya University in India. The Environmental Monitoring Branch's need to translate operational requirements into modernization solutions matches my foundation in requirements documentation, process analysis, and reporting.

As a Data Intern at AYLA Solutions in Australia in 2025, I gathered and documented business, data, and reporting requirements and translated stakeholder questions into structured analytical needs. I supported SQL extraction and validation, prepared advanced Excel reports, and contributed dashboard insights for performance reporting. Through Agile planning and reviews, I communicated progress and maintained clear analytical documentation. This experience developed my ability to connect business needs, reliable information, and practical reporting while collaborating.

My portfolio provides further evidence of structured digital delivery. In an e-commerce project, I converted business questions into a normalized data model, documented revenue and transaction rules, defined KPIs, and added repeatable validation and GitHub Actions checks. In healthcare operations analytics, I modelled connected program data and examined service completion, workload, costs, billing, and claims. Across three repositories, I documented assumptions, validated SQL outputs, developed Generative AI-assisted recommendations, and prepared Power BI reporting plans with defined decision uses. These projects strengthened my ability to organize complex work, identify data-quality issues, and present practical recommendations.

My earlier roles at Trans Globe Education and Arihant Investment in India strengthened my workflow coordination, reporting support, client and institutional communication, records management, and careful handling of confidential information. Graduate coursework in Project Management, Business Systems Analysis, Business Process Management, Enterprise Architecture, and Analytics and Business Decision Making further developed my understanding of project planning, process improvement, and technology-enabled change.

I am motivated by the opportunity to support environmental monitoring programs whose information and systems contribute to public decision-making. I would bring disciplined analysis, organized documentation, collaborative communication, and a strong learning mindset while developing the specialized environmental and Ontario public-sector knowledge required by the branch.

Thank you for considering my application. I would welcome the opportunity to discuss my contribution to the Environmental Monitoring Branch.

Best regards,

Jainali Mehta
